Innovations (learn more on pages 10-11)

- HeatSmart™ Heat Exchanger delivers heat inside the home or to outdoor living spaces
- Double pane ceramic glass and ClearFire™ Screen remain at extraordinarily low temperatures, reducing any potential for injury
- Zero clearance to combustible surfaces allows the freedom to finish with combustible materials right to the edge of the glass
- Elegant TouchSmart™ Wall Control
- Exterior Window Kit for indoor-outdoor or completely outdoor installations

Single-Sided Configuration

The Single-Sided Timber Fire embodies *Mountain Modern* at its finest, giving you an unrivaled presentation of fire that combines traditional style with innovative luxury. The grand scale of this enormous fireplace will command the attention of any room, while the understated elegance of the Single-Sided configuration is complementary to a wide range of applications.

Two Single-Sided Models:

48" x 30" and 72" x 30"

FEATURING HANDMADE BRICK LINER

See-Thru Configuration

The See-Thru Timber Fire opens up fresh possibilities to feature a stunning fireplace that provides flexible heating solutions. Rustic meets contemporary with this dramatic fireplace that offers dual fire views with different log set designs on each side. This configuration is perfect for anyone wanting to integrate two separate rooms or feature an indoor-outdoor installation that has the ability to heat both interior and exterior living spaces.

Learn more about the versatility of DaVinci's HeatSmart™ Heat Exchanger on page 11.

Two See-Thru Models:

48" x 30" and 72" x 30"

Features & Options

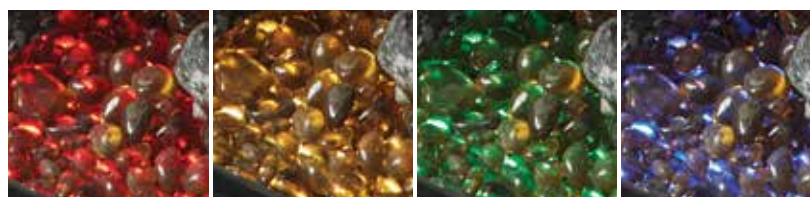

Rock Embers & Ember-Glo™ Glass Media Blend

Our signature blend of rock embers and high temperature fire glass beads over the Ember-Glo™ lighting mimic the realistic ember bed of a roaring fire.

LED Under-Lighting

Create the perfect ambiance for any occasion with full spectrum under-lit LED lighting.

Reflective Black Glass Liner

This high-gloss black glass has a warm reflective surface that enhances and intensifies the flame appearance.

Handmade Brick Liner

This classic brick design offers an elegance and charm that embodies the grand look and feel of a lodge fire.

Exterior Window Kit

The optional Exterior Window Kit gives you the ability to feature an indoor-outdoor presentation of fire, or a completely outdoor fireplace.

This photo shows an indoor-outdoor café with a view to the interior side through the Exterior Window Kit.

TouchSmart™ Hearth Industry Vesta™ Award Winner for
Best Hearth Components & Controls.

Elegant Wall Control Featuring HeatSmart™

DaVinci Custom Fireplaces™ feature our easy-to-use TouchSmart™ Wall Control interface. The sleek glass panel, in your choice of black or white finishes, connects you to technical features that DaVinci has perfected, including the HeatSmart™ Heat Exchanger, a 1-3 hour timer, overhead accent lights, and full spectrum under-lit LED lighting to help set the mood.

HeatSmart™

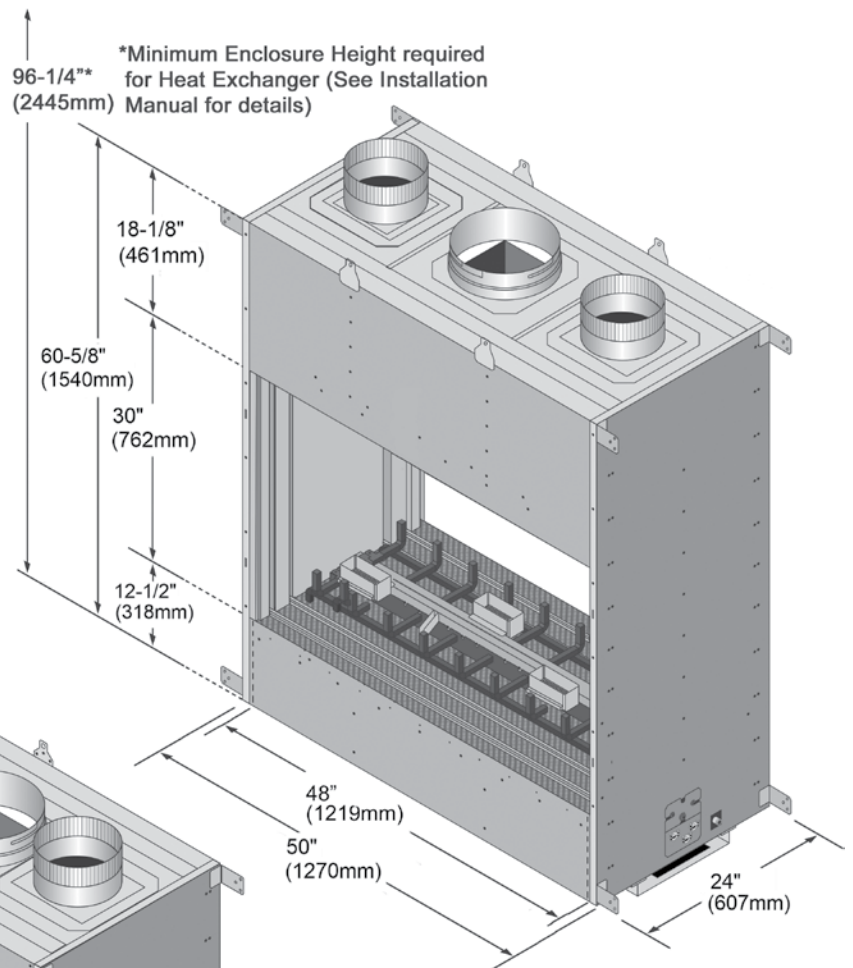

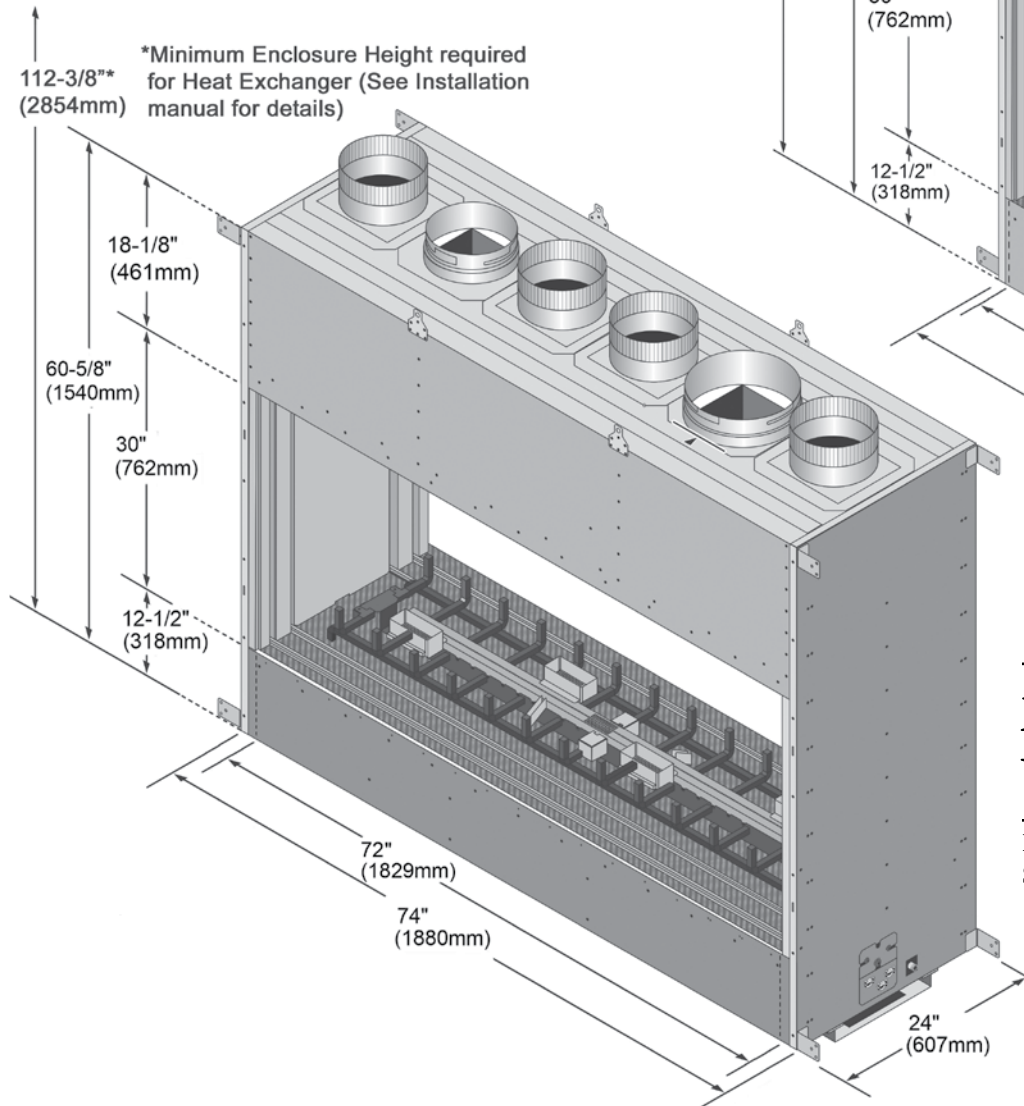

Heat Inside Your Home or to Your Outdoor Living Space!

A standard feature of the Timber Fire Collection™, the HeatSmart™ Heat Exchanger allows for more warmth to be generated than ever before. HeatSmart™ is controlled via the TouchSmart™ Wall Control panel or Smart Home Automation.

The versatility of HeatSmart™ allows for year-round enjoyment of DaVinci Custom Fireplaces™. Even on days when there's no need for heat indoors, the fireplace can direct heated air to your outdoor living space with the simple touch of the wall control.
